

CHARGE YOUR LIFE. CHANGE YOUR LIFE.

Hello BioCharger Owner,

The included fluorescent bulb is an easy way to visibly demonstrate the presence of the invisible energy field of the BioCharger and that it charges your whole body. The bulb will illuminate within range of the energy field.

### **SAFETY**

Please keep the silicone caps on the ends of the tube. This will prevent any potential small sparking in the hands of the person holding the tube which could occur with any metal object you hold. While not harmful, it can be a surprise and cause someone to drop the bulb. The caps will also keep the prongs from catching on anything and snapping off or breaking it accidentally. While operating the BioCharger, keep the recommended safe distance of 18 inches away from the enclosure for hands or any objects, including the bulb. Do not touch the bulb directly to the BioCharger while it is running a recipe.

### **DEMONSTRATION INSTRUCTIONS**

To demonstrate the presence of the electric field, hold the bulb in one hand somewhere near the BioCharger (like 3 feet) and it will illuminate. As you move the bulb further away the light should dim. You are demonstrating that the electric field strength decreases with distance and increases with proximity. This is why we instruct users to sit close to the BioCharger for maximum effect.

To demonstrate the presence of the electric field thoroughly charging a person, stand with one hand near the BioCharger while it is running, and hold the bulb in the opposite hand away from the BioCharger. The bulb will still illuminate because the electric field is being absorbed by the person holding the bulb and carried all the way through the body to illuminate the bulb. Step away from the BioCharger until the bulb goes dark, showing the BioCharger is not energizing the bulb. Keeping the bulb away from the BioCharger, extend your empty hand toward the BioCharger and slowly move closer. As your empty hand approaches the BioCharger, the bulb will light again, demonstrating when you are within the effective range of the invisible but beneficial energy field.

Enjoy!
